

GUIDED PROJECT

Practice Activity (after Task 8)

Prepare, Clean, Transform, and Load Data using Power BI

Instructor:
Olayinka Arimoro

**This activity is optional and ungraded.
The goal is to test your understanding.**

Activity One:

To complete the first activity, please follow the instructions below:

- Change the **Year** to Text
- Remove the **%** and **%_1** columns
- Rename **Append1** to **BoxofficeData(2019-2020)**

Go ahead and pause the video until you complete the task. When you're done, unpause the video and we will go over the solution together. Good luck!

Activity Two:

To complete the second activity, please follow the instructions below:

- Create the **DomesticSales** Column from **Domestic** without the Dollar sign
- Create the **ForeignSales** Column from **Foreign** without the Dollar Sign

Pro Tip:

In this activity, you will **add column from examples**. Remember that I showed you how to that in task 4 - that's the importance of these practice activities. **You can refer back to task 4 to get this done.**

Go ahead and pause the video until you complete the task. When you're done, unpause the video and we will go over the solution together. Good luck!
